

## Fan Descender - Simulated Parachute Jump

There are two Fan Descenders available to our clients. The first is our own design capable of a 16m drop. Although effective the unit requires regular maintenance and inspections. The second option is a Power Fan unit. These units are suitable for all applications and heights and require very little maintenance. Please contact us for more information or visit [www.powerfan.co.uk](http://www.powerfan.co.uk) for specification.
