

Low Ropes Course - Trees £4 - £6.5 k + Vat

The **guide** price above is based on a choice of **ten elements & platforms in trees**. An increase or decrease in the number of elements will be reflected in the ultimate price.

The elements can be installed as a linear or continual challenge course in the trees, allowing the group to traverse, whilst working as a team, along the line or around the circuit. Additionally, I have listed elements that work well as isolated challenges and not part of the challenge course.

We would recommend a tree inspection be carried out by an experienced arboriculturist for all courses built in trees. This does not only ensure the safety of the course but of your site from incidences involving falling trees and branches.

Features:

- 25 year warranty on all workmanship
- Safety signage
- 'Select Grade' treated poles produced in the UK for use in schools and timber play equipment
- UV Resistant Hand Ropes and Nets
- Galvanised & Zinc Plated components
- Can be easily developed at a later date
